

### Energy Post Weekly (EPW)

The online, premium newsletter for professionals who need the big picture delivered succinctly from a reliable, independent source.

**EPW** summarises what is happening and comments on what it means **in three regular sections**, so you never feel you've missed out on what you need to know.

## 3 GREAT REASONS TO SUBSCRIBE

### Follow all the major energy issues and trends with **Karel Beckman**

The energy transition, the real potential of renewables, the position of gas in the low-carbon economy of the future, the future of unconventional gas, climate policies, geopolitical developments, "pipeline politics", Big Oil and more.

### Get access to Brussels Insider by **Sonja van Renssen**

Fascinating interviews and articles from one of the most experienced journalists in Brussels. Sonja zooms in on the complex energy issues debated and decided upon in the EU capital. She explains what's going on in the major Brussels dossiers: on gas, market design, emission trading, innovation, infrastructure, efficiency and more.

### PLUS: Energy Post **Express**

This is all the new content from Energy Post succinctly outlined, in an easy to digest format. This ensures you won't miss anything worthwhile that we report on.

**6 ARTICLES  
PER WEEK**

**OPTIMISED  
FOR MOBILE**

**46 ISSUES  
PER YEAR**

**All exclusive material, only accessible to subscribers**

**EVERY FRIDAY  
FROM €6.50 / WEEK**

**REGISTER**

**FOR A FREE, NO STRINGS 30-DAY TRIAL NEW ISSUE EVERY FRIDAY**

### November 4, 2016 - CONTENTS

#### THIS WEEK IN ENERGY WATCH

- #1 Solar tiles and Powerwall 2 - more energy shockers from Elon Musk
- #2 German-Austrian power union falls apart
- #3 Sweden goes for 100% renewable power
- #4 Trump's climate shock
- #5 McKinsey behind the curve on energy

#### THIS WEEK IN BRUSSELS INSIDER

- #1 EU defends decision on OPAL
- #2 Europe does not need TTIP for US LNG

#### THIS WEEK IN EXPRESS

- #1 The future of advanced nuclear
- #2 Future of Nord Stream 2: If it's to be stopped, Brussels will have to do it - no-one else will
- #3 Future of utilities: there still is time to adapt
- #4 The future of mobility

### October 28, 2016 - CONTENTS

#### THIS WEEK IN ENERGY WATCH

- #1 Renewable energy auctions - how effective are they?
- #2 What to expect from: solar, wind and biofuels
- #3 How will the EU gas market evolve?
- #4 Does wind power threaten grid stability?

#### THIS WEEK IN BRUSSELS INSIDER

- #1 Energy security updates:
- #2 Where do we stand on gas?
- #3 What's coming for electricity?

#### THIS WEEK IN EXPRESS

- #1 What to think of Guarantees of Origin?
- #2 What to think of Nord Stream 2 and the EU's deal with Gazprom?
- #3 What to think of 100% clean energy for the US - and the UAE?
- #4 What to think of French versus German energy policy?

## SNEAK PREVIEW **Take a look at a couple of recent, popular articles which we have unlocked to give you an example of what to expect...**

### INTERVIEW - Maroš Šefčovič, EU VP Energy Union

**"I made the promise that 2016 would be the year of delivery and I intend to keep it"**

October 07, 2016

*"If we want a cost-effective transition to a low-carbon economy, we have to create an internal energy market where European rules apply", says Maroš Šefčovič, the European Commission's Vice President for the Energy Union, in an exclusive interview with Energy Post. According to Šefčovič, "big parts of our energy market are [still] overregulated". To take a decisive leap towards the Energy Union, the Commission has decided to put all its energy eggs in one basket and come up with a big "winter package" of energy proposals before the end of the year. "I made the promise that 2016 would be the year of delivery", says Šefčovič, "and I intend to keep that promise."*

Maros Sefcovic - photo: Europe by Satellite

This was a big week for Europe. The EU agreed to ratify the Paris Climate Agreement – ahead of individual Member States – and thereby ushered in its entry into force. After migration, Brexit and the troublesome trade agreement with Canada, it was embraced as a welcome sign of European unity.

### INTERVIEW - Johannes Teyssen, CEO of EON

**The new EON, the new Johannes Teyssen: "The future is state-led renewables, stop dreaming of perfect Energy Union and Emission Trading System"**

September 30, 2016

*In one of his first in-depth interviews since the restructuring of EON, CEO Johannes Teyssen sets out a completely new vision of where he sees European energy markets and policies going. The future according to Teyssen is: distribution much more than transmission; state-led renewables auctions and capacity markets, not wholesale energy-only markets; carbon taxes or floor prices, not carbon trading or emission trading; higher energy efficiency targets, not higher renewables targets; and a total overhaul of the grid. Teyssen, who only three years ago told Energy Post he was opposed to national support schemes for renewables and wanted only the EU's Emission Trading System as climate instrument, now says he is not much interested anymore in EU "dreams" of "a perfect world of an Energy Union with a perfect*

*level playing field": "I'd rather see some low-hanging fruit harvested". His first priority now is "my customers", the second EON. "Politics is a distant third."*

Less than two weeks after EON completed the spin-off of its conventional energy arm Uniper, Johannes Teyssen, the man who led this first radical restructuring of a major European utility company shaken by the energy transition, appears to be a new man himself. He has a very different vision of the future than he displayed nearly three years ago in an interview we did with him
