The legacy for AutoCAD and other Autodesk products is the program's ability to create 2D, 2.5D, and 3D computer-aided design drawings. AutoCAD is used in industrial design, aerospace design, mechanical engineering, architecture, geomatics, and planning and surveying applications. The AutoCAD 2015 R1 release is expected for late April 2015. This is the third major release of AutoCAD since 2014, and the first since AutoCAD 2016 was released on September 28, 2014. The annual AutoCAD release cycle began in 2010 with AutoCAD 2013. AutoCAD 2020 is scheduled for release on August 1, 2019. Core Features The base release of AutoCAD has no charge. AutoCAD Standard 2016 costs \$2,995. AutoCAD Standard 2013 costs \$1,795. AutoCAD Premium is priced according to the number of views, pages, types, layers, and other factors. There are no updates or upgrades to AutoCAD Premium or higher editions with new functionality. Standard 2019, Standard 2014, Standard 2013, Basic 2013, and Basic 2012 are the only editions available for pre-release. All AutoCAD editions can be purchased individually or as part of the AutoCAD Ultimate subscription. Installers for Windows and macOS allow the application to run from an external drive or from a single CD (both burnable CDs and ISO images are supported). AutoCAD for Mac requires Mac OS X 10.9 or later. AutoCAD for Windows requires Windows 7 or later and a hard drive for storage. AutoCAD for macOS includes Snap feature support. Files are saved to an external hard drive or flash drive or to the Local network location. Editor modes for drafting and drawing enable users to switch between the different editing modes. Users can use the user interface to change the current drawing space to any other space, another drawing, or a custom space they create. The user interface allows users to switch between 2D and 3D, whether the drawing is oriented in landscape or portrait mode, and whether it is horizontal or vertical. The current drawing window and viewing area can be resized. There are several keyboard shortcuts for common user operations. The file format has a robust security and validation system. The latest releases support vector graphics (SVG) and.dbx formats. AutoCAD

AutoCAD also supports other third-party add-on applications including Autodesk Map 3D, Autodesk Navisworks, Autodesk Inventor, and DGN Viewer. In the 1990s the Microsoft Windows platform was dominant, and AutoCAD was released as a Windows-only application. However, other platforms have since come into dominance, notably Mac OS X, Linux and Windows XP (from Vista). AutoCAD LT is available for Mac OS X and Linux. In May 2014, Autodesk announced that AutoCAD software is available on Google's Android platform as well as iOS. AutoCAD was also available for PC Windows up until 2007, when Autodesk announced that the software would be removed from the Windows market. The software could be bought, but Autodesk pulled all support for the Windows version on October 1, 2007, although a version for use with Windows Server 2008 still exists. In June 2010, Autodesk announced the discontinuation of AutoCAD LT. As of 2013, AutoCAD LT is available for both Mac OS X and Windows. AutoCAD is available for Android on the Google Play platform in the form of a free app with no restrictions. It can be downloaded directly on the Android

device through the Google Play Store. As of 2013, AutoCAD is available for the Apple iOS operating system, in the form of a free app with no restrictions. It can be downloaded directly from the App Store. The free AutoCAD drawing viewer for Android is available for download in the Google Play Store. In 2014, AutoCAD was re-released on Windows XP SP2, Windows 7, Windows 8.1 and Windows 10. AutoCAD is available for macOS using the last versions of 10.7 (Lion) and 10.8 (Mountain Lion). Q: How to properly use a TestActorRef in Flutter I was trying to create a unit test to check if my Flutter widget is handling properly a received message. First, I've created a StreamBuilder which returns a FittedBox: Widget _buildMyWidget() { return StreamBuilder<(stream: getMyObjectStream(), builder: (BuildContext context, AsyncSnapshot> snapshot) { if (snapshot.hasData) { return Center(child: ListView(children: snapshot.data.map((MyObject myObject) {
