What's New Check out our big new Content update, with a completely new set of landscapes and a ton of new customization options! (Yeah, we know, Magusians, there is always room for improvement... But if that was the case, we'd be too busy to paint) See the changelog for details on all new features! Requirements OK, so what do I need to play the game? This is a game for comic, fantasy and pixel art lovers, someone who appreciates challenging gameplay and with user-friendly controls. The game has been set to be playable on Android tablets, and with some tweaks, it can also run on mobile phones. We have also created a version of the game for smartphones. However, this version makes the app a bit sluggish, which means you need to be patient with this while figuring out your empire! We have also added an in-game "Switch device" to play the game on one device (phone or tablet) and send reports to your other device. If you are using these older Android devices, select the version of the app that would fit the best to your device. 1.4.9 ROM change, please update to the latest version! Jan 21, 2018 This update has some important features, but we consider it important to also have all the necessary fixes and minor issues. We always want to improve the game, but we want it to do so in balance to keep your experience great! The only way we could do that is to do it slowly, measure the feedback and then make changes accordingly. The biggest update for this release is a change of ROMs, to the latest one offered by Nova 3 for Android (Android 7, 0), which gives a better performance and speed for both older and newer devices. This means the below list of devices will fit better on your device. Please, keep your expectations to the typical updates on Play Store, because the things that have this title listed do not have this

Q: Substring similarity function For a string like Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean commodo ligula eget dolor. Aenean massa. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Donec quam felis, ultricies nec, pellentesque eu, pretium quis, sem. Nulla consequat massa quis enim. I need to divide the string into words and return similarity based on 2 words: test and dolor, and check if test or dolor is included in the first 100 characters of the document. It has to be regex. Function below, for example, should return 0.01 as similarity, since it looks the same to the user test and dolor are included at the beginning of the document: Lorem ipsum dolor sit amet. Lorem ipsum dolor sit. Lorem ipsum dolores ipsum dolor sit amet. Lorem ipsum dolor sit amet. Notice that, in the documentation, I need to use strings from Character or String. But in the case of a string I need to use Substring. A: If the first part of the string does not matter, then this should do it: var docString = "Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean commodo ligula eget dolor. Aenean massa.
